I. Introduction

The majority of students, in this class, have not been exposed to the concept of innovation, which is a crucial aspect of the economy. Without understanding how to innovate, students may find it difficult to excel in the business world.

II. Literature Review

According to [Author], innovation is defined as the process of introducing new or improved products, processes, or services. According to [Author], this definition is applicable to any field, including the economy.

III. Methodology

The study will utilize a survey method to gather data from students. The survey will include questions related to their understanding of innovation and its importance in the economy.

IV. Results

The results of the survey will be analyzed to determine the level of understanding students have about innovation. The findings will be discussed in the conclusion.

V. Conclusion

The study provides valuable insights into the understanding of innovation among students. It highlights the need for educators to emphasize the importance of innovation in the classroom.

El perro corrió hacia la casa, pero la puerta estaba cerrada. Luego, se dirigió a la escuela. Al llegar, vio a todos sus amigos. Comenzaron a jugar, saltar y correr en la patio. Era un día hermoso y el sol brillaba en el cielo. Después de un juego exhaustivo, los niños se sentaron en el piso de la escuela, hablando sobre sus sueños y aventuras. Al finalizar el día, regresaron a sus casas, agotados pero felices de pasar el día con sus amistades.
